New York, NY

EDUCATION

Texas A&M University

College Station, TX

Bachelor's of Science Computer Engineering & Mathematics Minor - Cum Laude

December 2024

2022 Recruitment Excellence Award, 2023 IFC Rising Star Leadership Award, 2nd Place CSCE Capstone, Order of Omega

WORK EXPERIENCE

Hover

New York, NY

Solutions Engineer

Nov 2025 - Current

- Served as primary PoC for partners and customers, leading integration development from discovery to design to implementation.
- Developed Ruby API endpoints and standardized integration workflows, driving product adoption & surfacing pain points to influence product decisions.
- Founded the "Hover Developer" partner newsletter - personally designing and writing each volume.

Dell Technologies

Austin, TX

Software Engineer - Supply Chain Modernization

Feb 2025 - Nov 2025

- Designed final Figma MVP, trained and presented 2 AI/ML (RAG, LSTM) solutions, worked as a full-stack developer on a product used in factories internationally.
- Facilitated multiple live demos, translating technical product concepts to non-technical audiences

Software Engineer Intern

May 2024 - August 2024

- Collaborated cross-functionally to automate a large demand verification process, reducing manual workload by 6 hr/week. Further optimized code to reduce runtime by 75%. Written in Python.

Product Design Intern, Campus Ambassador

May 2023 - August 2023

- Led internal product design initiative focused on enhancing efficiency, streamlining workflows, and optimizing user experience for a project management team.
- Conducted in-depth user interviews, analysis, and comprehensive story mapping, prioritizing functionality.

Poly (HP)

Austin, TX

Inside Systems / Sales Engineer Intern

May 2022 - August 2022

- Engaged clients, recommended solutions, and streamlined product integration. Conducted comprehensive front and back-end testing of Poly hardware across diverse ecosystems.

PROJECTS

Chaser (mobile & web)

Spring 2025 - Current

Co-founder, CEO - chaser elevates bar district night-life and provides bars with unique customer insights.

- Architected and built full-stack mobile + web app from the ground up: React (Native), Postgres, AWS S3, Stripe, and Plaid.
- Drove product vision and go-to-market strategy: leading bar outreach, user research, and continual iteration.

Solar Tracker (Provisional Patent - 20459/10002)

Fall 2024

ML Engineer, Embedded Systems

- Senior capstone (winning 2nd) designed to provide highly granular data and forecasts to market participants.
- Weatherproof, solar-power system built using AWS EC2, Postgres, React, Node.js, various sensors & cameras. LSTM and CNN models trained on self-collected data.

LEADERSHIP AND INVOLVEMENT

Alpha Tau Omega Fraternity

College Station, TX

Director of Recruitment, PR, Recruitment Excellence Award, IFC Rising Leadership Award

May 2021 - December 2022

- Spearheaded executive board decisions on \$100,000+ contracts, personally managed \$40,000 budget, oversaw team of 5-8, and led recruitment efforts for a 120+ member chapter — delivering record-breaking new member classes.

Local Corporate Director - IEEE TAMUmake

College Station, TX

Oversaw funding and business sponsorship for annual hardware hackathon. Budget of \$3000.

October 2021 - October 2022

SKILLS

- Programming Skills: Python, C#, C++, Git, Java, React, Angular, HTML, JavaScript, CSS, Verilog, PostgreSQL/MySQL, NoSQL DB, Node.js, TensorFlow, PyTorch, AI
- Technical Skills: Figma, Prompt Engineering, Machine Learning, AWS, UI/UX Design, Data Science/Engineering, New Relic, REST API Design, Embedded Systems, Neural Networks
- Soft Skills: Workflow discovery, Recruitment, Project management, Executive + Interpersonal Communication
